### Background:

The North Dakota Association of Community Providers has organized this symposium to address concerns related to medical marijuana.

In the caregiving field, questions have arisen with regards to clients using medical marijuana and how that will affect caregiving staff, caregivers who use medical marijuana, administration of medical marijuana to clients, and medical marijuana in the workplace.

Some things to consider when evaluating your policies:

- Pre-Employment Testing
- Testing Positive vs. Impairment
- Caregiver Role in Client Use
